Subject: Fwd: Draft Summa Canister Air Sampling Data for Ace Warehouse Fire Parkersburg
Attachments: unvalidated_to-15air 1710022.pdf; ATT00001.htm; Summa Canister Data Results.xlsx; ATT00002.htm

Hi ATSDRers

See below for draft summa data from EPA and Ohio EPA. Do any of you have time to review? Karl, Bob and I are all on the road tomorrow for an all day meeting in Harrisburg but we will try to look at on our phones.

It would be great to pull together a draft email on this info along with the CTEH data sometime this week. We could figure out a strategy for this via a phone call in the morning while we are driving to our meeting if that might work?

Karl was on the CTEH website earlier today, and the only data on there still is just the mini can data Charles looked already.

Thank you for your continued help on this. Lora

Subject: Draft Summa Canister Air Sampling Data

Hi Lora

Attached is EPA's Draft Analytical Results from the Air Sampling conducted on 10/26/17. This preliminary data and has not gone thru QA/QC but I am forwarding it for your review...

I have compiled a chart of exceedances above the lab's Quantitation or Reporting Limit. I have also include Ohio EPA summa canister data on the same chart.

I also tried to include some screening levels but I'm not sure what would be appropriate for this case. I looked at the EPA residential indoor air as well as AEGLs. Any input you have on screening or comparison levels would be great.

Results from EPA's and Ohio EPA's sampling appears to be consistent.

We also collected post-fire air sampling on 11/2/2017 and I will forward those results once we receive them from the lab.

The Area Rae data needs to be reviewed by START for comparison to notes collected when conducting visual readings. I will pass them on as soon as available

Debbie Lindsey
